GREENWOOD HUBBARD CHEVROLET-HUBBARD, OHIO

Hubbard Township is home to Greenwood Chevrolet's newest facility. Conveniently located at Rt. 80 and Rt. 7, this state of the art automobile dealership was designed by Baker, Bednar & Associates, Inc. The team of architect representative Chris Bebb, owner representative Randy Kimble of Greenwood Chevrolet, jobsite manager Dan Herr of Adolph Johnson & Son Co. and the subcontractors worked closely together on this 9 month 27,770 Sq. Ft. project. Not even flooding and one of the worst winters in history could stop them from successfully completing this project. It's certainly worth the drive to experience the beautiful facility and quality people within.

Sky Bank, Boardman OH

The new Sky Bank in Boardman opened with pride Wednesday, April 21st. The futuristic design by ms Consultants, inc. of Youngstown was completed “on-time” in spite of a tight schedule, extended lead-time products and winter conditions.

A special thanks to all of our subcontractors, to our field leader, Mark Dibell, and his crew of carpenters in their successful effort overcoming the many challenges of this project.

President’s Ponderings...

Aesthetics, appearances, setting, atmosphere, character, beauty; What an important part of our existence these things play.

From our individual appearance (as evidenced by the huge fashion and cosmetic industries) to the desirability of a community or even a region based on the visual environment nature and/or man has created. The emotional and economic impact is enormous.

The good feeling and confidence when we are pleased with our appearance, the desire to dine at the restaurant with our pleasing colors, lighting and appointments, the positive healing effects of a healthcare facility with attractive design features, the appreciation of property values in communities where the citizens put an emphasis on the collective appearance of the infrastructure,

buildings and landscape are examples of how our lives can be improved by pleasing visual stimulation.

As a builder there is no question we have an added interest and excitement when we participate in a project that will create an attractive, positive environment.

Although it may require a little more effort and resources to create that look of which we can be proud, the end result provides a gratification that lasts for years.

Paul A. Johnson Jr.
